

## LuminaPrairie

The LuminaPrairie creates the experiences of aurora borealis... dancing Northern Lights! This semi-transparent structure combines the freedom and width of the prairies with the fascinating Northern Lights, a cherished phenomenon in Manitoba.

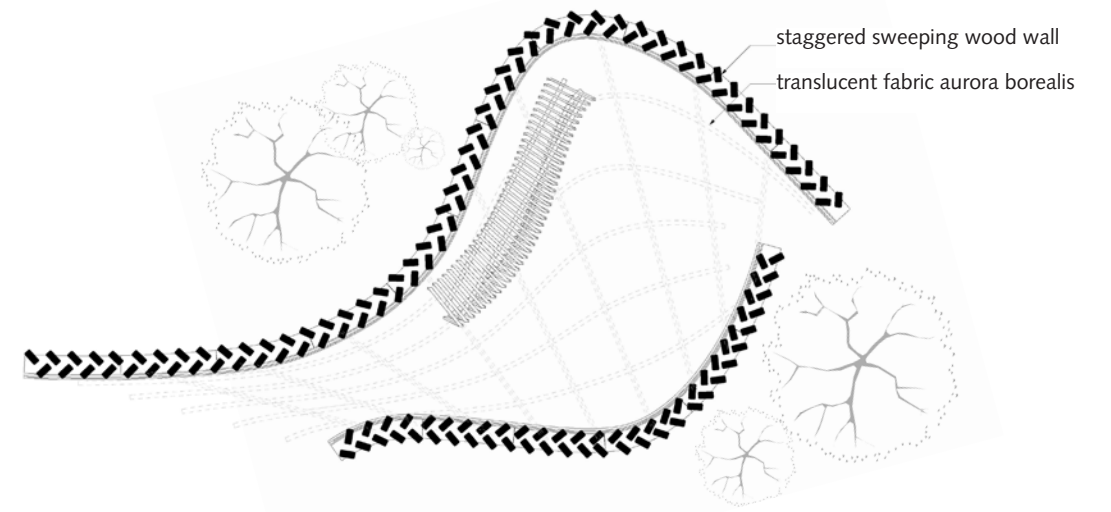

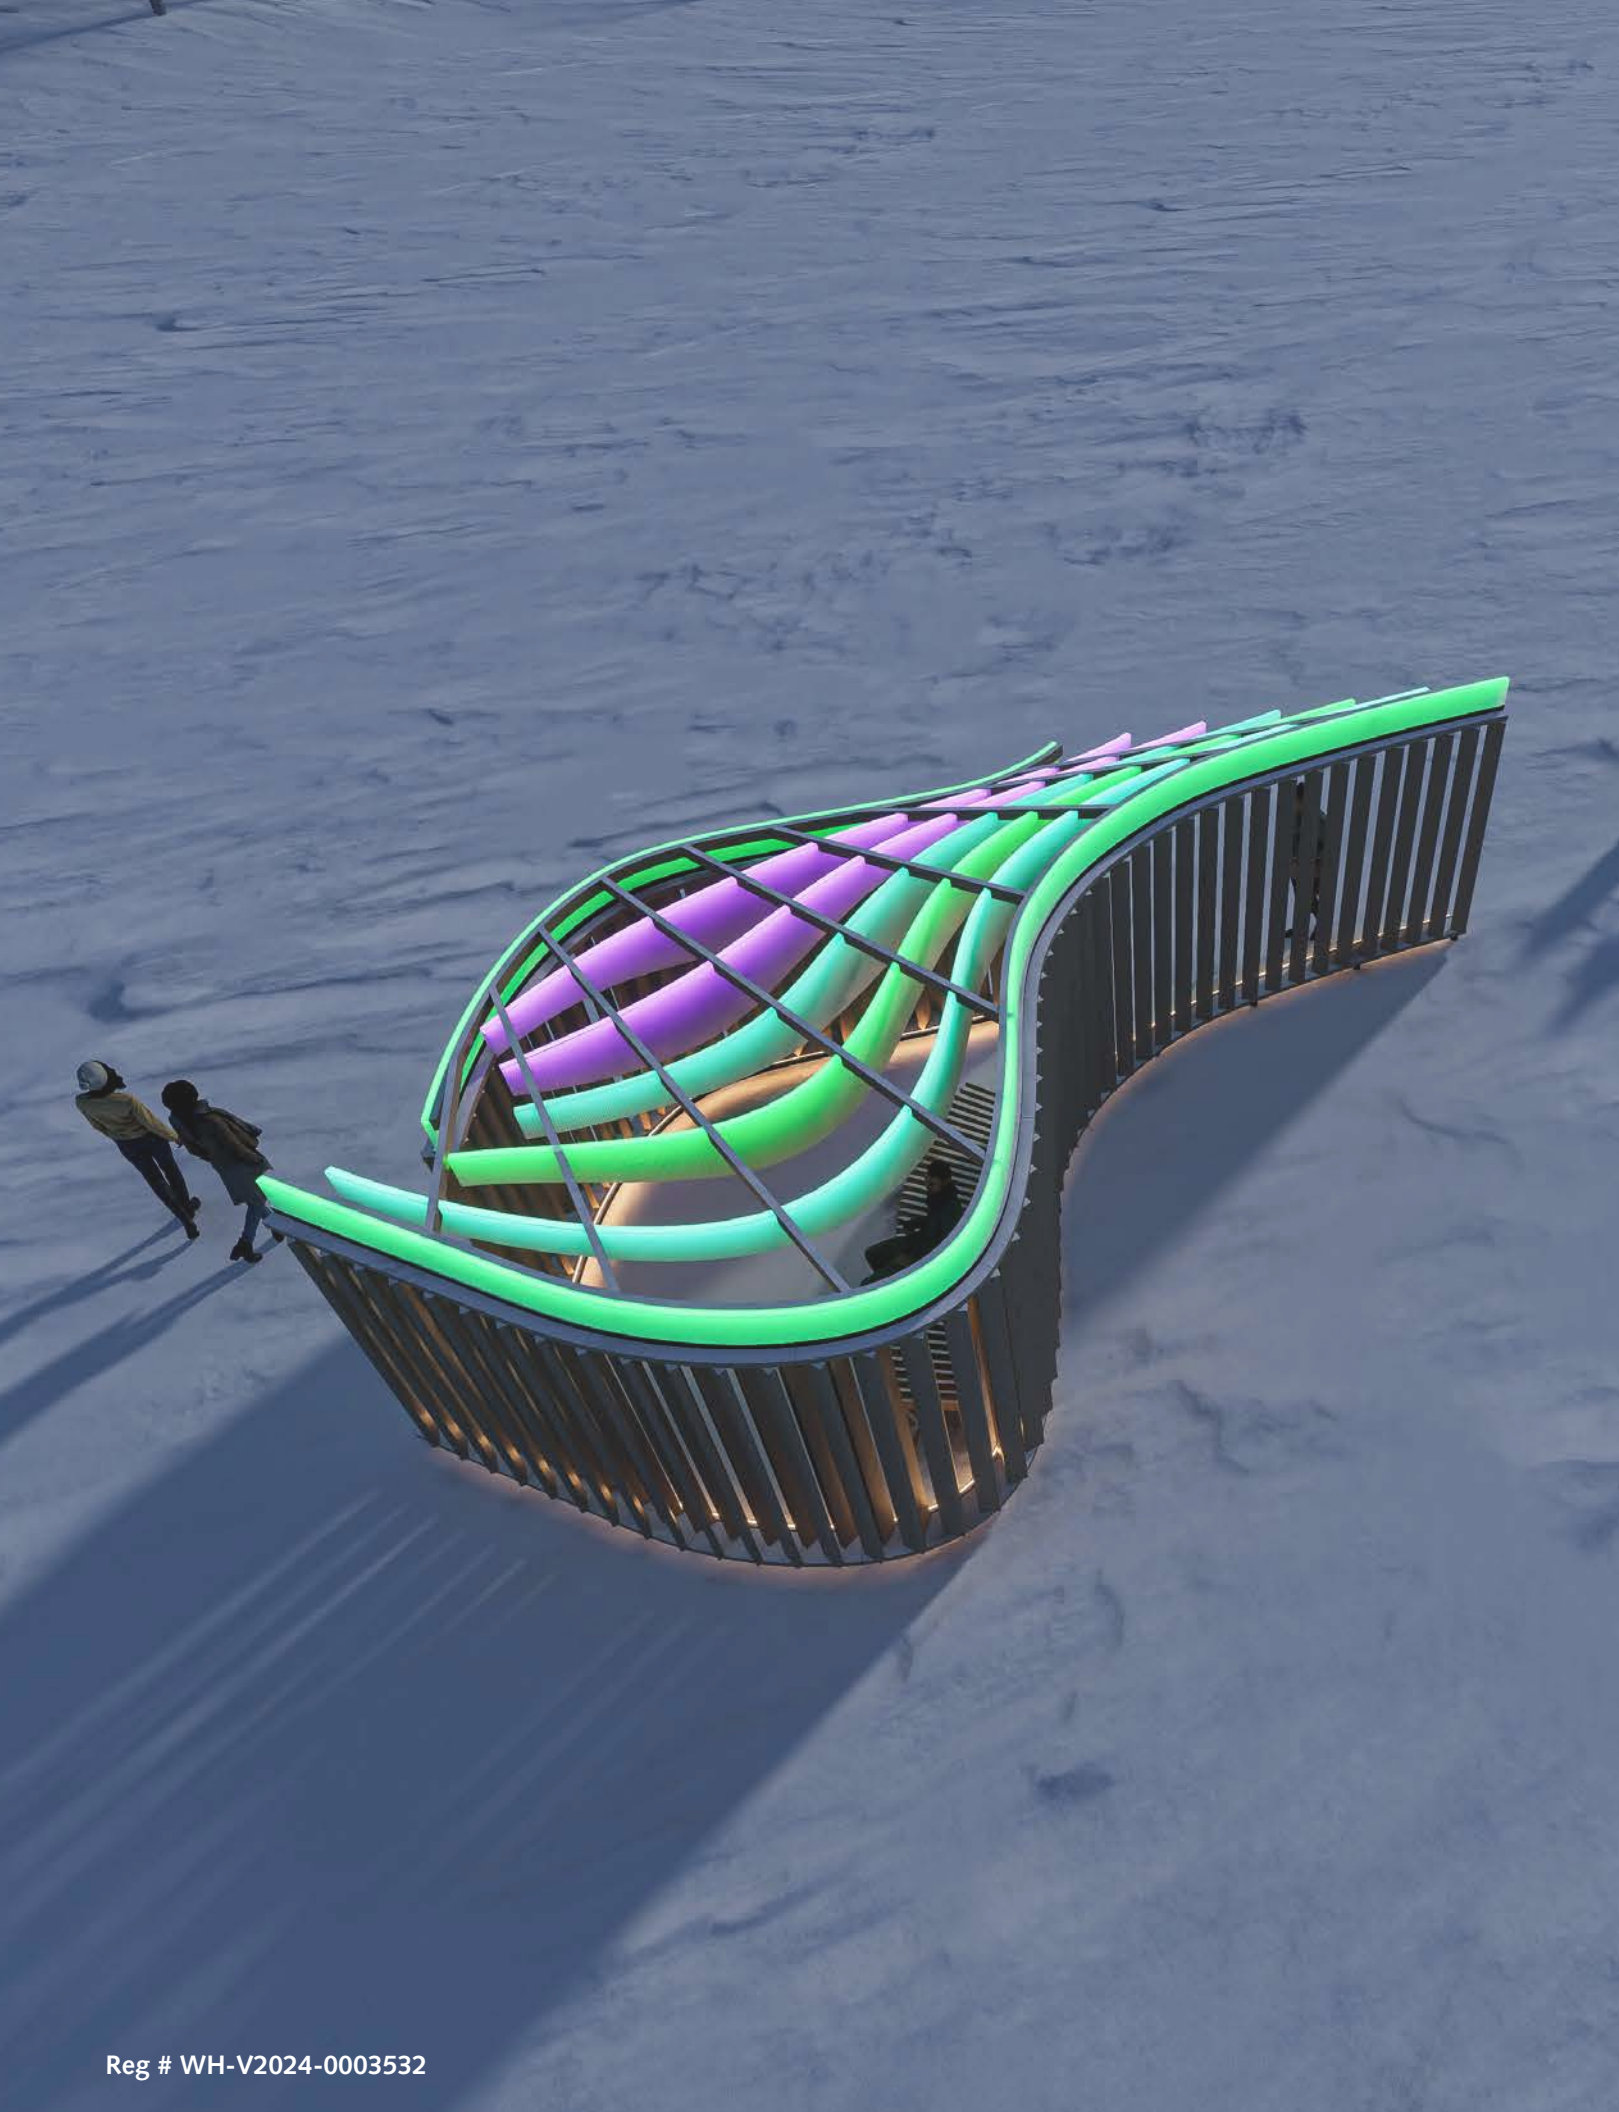

Two curved walls, inspired by the undulating contours of the prairies and the rhythmic sway of its grasslands, elegantly form over the ice. Open entrances invite visitors into the dynamic space where walls of vertical wood framing create a semi-private retreat amidst the crowded, frozen river. Diverse viewpoints offer changing perspectives. The roof is the highlight featuring a light installation embodying the Northern Lights. LED lights in colours of the aurora borealis meander through the space as fabric beneath softly underlines the movement of the rays. Visitors can skate or walk through the installation and are kindly invited to sit or move whilst watching the lights dance!

A little outdoor magic on the frozen river trail!
